

Manugraph's Participation at DRUPA 2016

Manugraph India Ltd. the Indian icon in the manufacture of web off-set presses will once again be participating at DRUPA 2016. A nostalgic look down the years will show how Manugraph has single handedly put India on the global map in the print manufacturing space with their state-of-the-art technology, R&D and after-sales-services. Testimonials from printers & publishers across the globe with installations of the MIL presses confirm the company's outstanding contribution to the printing industry.

DRUPA 2016 will see Manugraph debut its latest offering "ECOLINE" to the International market. Mr. Sanjay Shah, Vice Chairman & Managing Director of Manugraph said " ECOLINE is a 2 x 1 press exemplifying the perfect combination of state-of-the-art technology with minimum floor space & single level operation. We consider it a model press for small to medium newspapers & feel we have delivered the right technology at the right time in the marketplace." He further stated "In India the machine has already sold 4 towers since its launch with another order underway."

Manugraph has also recently sold its very first 2 x 1 press the M360 to the American market, therefore the company is keen to meet up with customers from the North American continent at DRUPA to see how best they can be served.

Additionally, MIL has expanded its range of services by refurbishing printing presses & retro-fitting machines with upgraded & new technology, which will also be highlighted by the team at DRUPA.

The company will not have any exhibits on display this time; however detailed information on their range of products & services will be available at the **Manugraph stand in Hall 6, Stand 6/B30**. The Sales & Marketing & team will be present at the stand to answer customer queries.
